

**Digital Output Relay kit & harness**

**Description:**

The Digital Output On/Off Relay kit is a pre-wired relay and fuse block to be used with PE3 ECU Series or Stock ECU. With 15 amps of max current capacity, controlling your cooling fan, fuel pump or water pump has never been easier.

**Uses:**

The Digital Output Relay kit can be used to control most On/Off devices. See examples below:

- Cooling fans
- Fuel pumps
- Water pumps
- Other DC motors

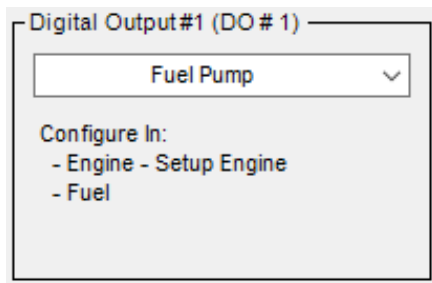

**Example**

**PE3 Monitor Configuration**

**Fuel Pump Control**

- Fuel pump is set to prime for 6 seconds when power is applied to PE3 ECU.
- Fuel pump will be active only when RPM is detected.
- **Stock ECU** – Relay ON when ground is applied to Orange/Blue 20ga wire

**Wire Color**

**Connection Details**

<b>Orange/Blue 20ga</b>	Available PE3 Digital Output or Stock ECU Fuel Pump Control
<b>Red 14ga</b>	Battery Positive
<b>Yellow 14ga</b>	(+) Positive side of device being controlled.
